
Trees and Small Shrubs

Trees and Small Shrubs for Planting on Land that is to be Adopted as Highway

This list is not definitive but gives a broad indication of trees and small shrubs that would be acceptable in areas, within development schemes, that are to become part of the adopted highway.

The recommended planting distances from the carriageway edge may be varied in specific situations e.g. avenue planting.

Only low growing shrubs have been identified. These are considered suitable for narrow planting areas or where wider areas of verge are to be adopted for visibility splays.

Where there are wide verges, without visibility restrictions, larger shrubs can be planted.

Trees and Shrubs for Landscape Planting, published by the Joint Council for Landscape Industries, is recommended for further information.

All planting within areas to become part of the adopted highway are to be approved by the County Council, as Highway Authority, prior to implementation.

GENERA	SPECIES	VARIETY OR CULTIVAR	ENGLISH NAME	Size			Shape			Growth Rate			Distance from Edge of Carriageway
