

Approved List of Oxfordshire Pharmacies providing Needle Exchange Service

Sharing injecting equipment can increase risk of infections and blood-borne viruses like Hepatitis and HIV. If using injecting equipment, always use new, sterile supplies each time.

Needle Exchange service is a free and confidential service for anyone who injects drugs. You can get new, sterile injecting equipment through the service and the service also disposes of used equipment safely.

Needle Exchange service is available from [Turning Point](#) or from some community pharmacies. The following list of pharmacies have been approved to provide Needle Exchange service.

Please note that sometimes pharmacies may close permanently or change ownership and may no longer be able to provide Needle Exchange. Other pharmacies may also sign up to provide the service, and so this list will be regularly updated.
